

## Pothole Patch Emulsion - (C70BPF1)

Cold Chon Pothole Patch is a specially designed, cold laid, delayed-set macadam suitable for all road maintenance work. Cold Chon Pothole Patch contains a specialised polymer compound which acts as a bridging effect to interlock aggregate layers together, hence giving its strength and resistance in the pothole. The workability of the finished product is further enhanced by special cutting agents in the bituminous binder.

- Proprietary emulsion incorporating a polymer binder and special adhesion agents
- Finished product can be stockpiled and used as needed
- Manufactured to an ISO 9001:2008 Quality Production System & ISO 14001:2004 Environmental Management System.
- Low temperature application which saves on fuel

### AREAS OF USE

Repairing Potholes, Backfilling Trenches, Re-filling Core Holes and Levelling Rutting Depressions. Cold Chon Pothole Patch is also ideal for lightly trafficked areas.

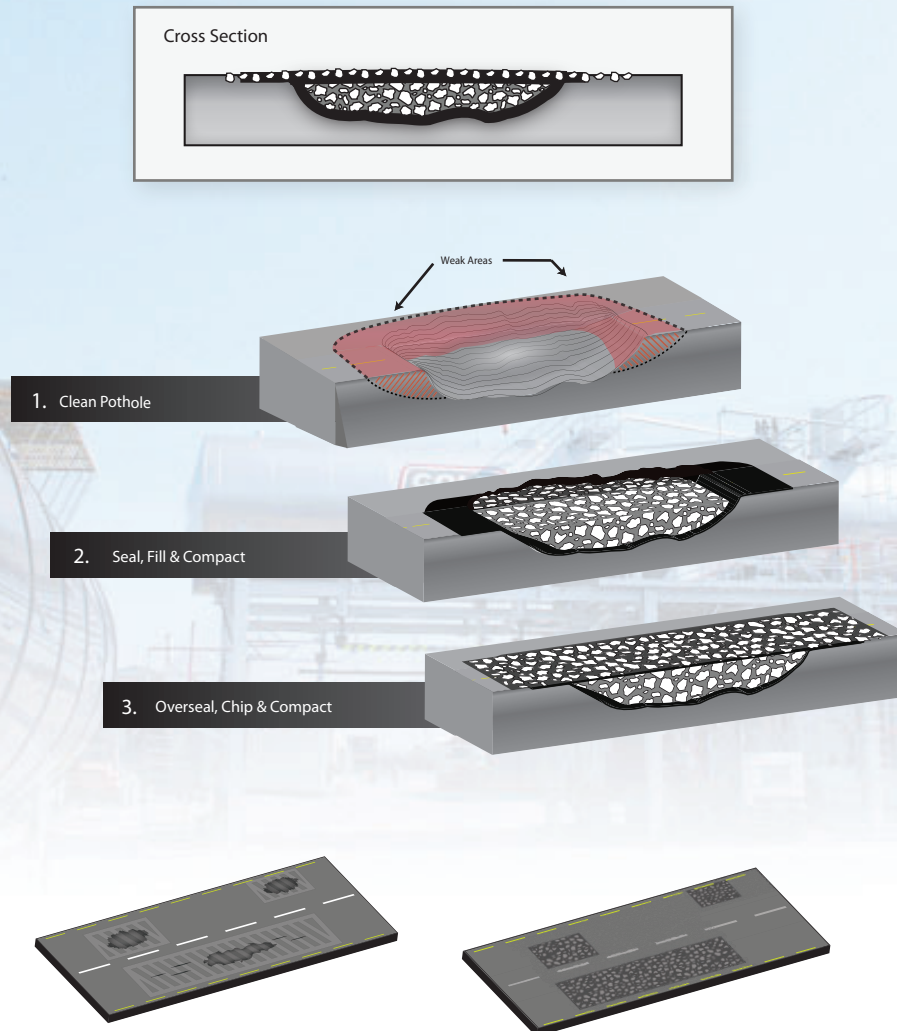

### APPLICATION OF POTHOLE PATCH

Cold Chon Pothole Patch is workable and easy to spread, it does not adhere to spreading tools.

- Prior to filling a pothole remove any debris or water from the pothole.
- Slightly overfill the pothole to allow for compaction of the pothole patch.
- Compact the Pothole Patch (hand tamper, light roller, vibrating plate etc.)
- Traffic can be opened immediately
- Approximately 25kg/m<sup>2</sup> of Pothole Patch is required to fill to a depth of 1cm.
- Unused Pothole Patch can be re-used once re-sealed.

## APPLICATION

Patchwork Chip & Seal for following winter if no surface dressing during summer.

## STORABILITY

It is recommended to store Cold Chon Pothole Patch at ambient temperatures to aid workability. Cold Chon Pothole Patch is frost resistant.

## ENVIRONMENTALLY FRIENDLY

Cold Chon Pothole Patch is energy friendly as it is a cold mixed material which in turn reduces green house gas emissions when compared to a typical hot mix macadam.

## HEALTH & SAFETY

Always wear the appropriate PPE when handling Cold Chon Pothole Patch. Avoid contact with skin and eyes. Avoid eating, drinking and smoking when using this product. Wash hands and contaminated
